

HIGH LEVEL GUTTER CLEANING

OVERVIEW

SuperGutterVac provides regular gutter maintenance for residential blocks across Essex using our ground based SkyVac system. This allows us to safely and efficiently clear gutters on multi storey buildings without scaffolding or access equipment.

CHALLENGES

During a routine visit to a three storey block, our team identified a hopper containing an abandoned bird's nest and egg. To ensure responsible practice, we left the nest in place and returned later in the season to remove it safely. The remainder of the gutters were cleared as normal, restoring full flow and preventing potential water damage.

SUMMARY

This project reflects our focus on safe access, environmental responsibility, and reliable maintenance for property managers and residents.

AT A GLANCE

Project: Gutter clearance

Location: Essex

Property Type: Residential block of flats
